

Day 9 -6/6/2025

The team visited four villages (Nurla, Tia, Temisgam and khaltsi villages). Expert from KVK Leh and various line department Leh District imparted awareness regarding government scheme related to new technology. The horticulture department discussed the subsidized scheme related to drip irrigation, vermicomposting, power tiller, Tabular greenhouse, SDP plan (Nursery), Polythene and Sapling. Whereas Animal Husbandry Department discussed detailed information related to Council Unit & SDP unit of Cow Dairy Unit and KCC Scheme. Also Silage, Feed, SDP dairy unit with 50% subsidies, Yak kid (Yak herder), Horse (75%)Subsidies. Artificial Insemination under NAIP programme to aware farmer they can get of sex sorted insemination with best breed. They also get demonstration on low tunnel technology, mulching and drip irrigation. Good agriculture and Natural farming. From CAZRI institute they get information related to Seabuck thorne harvesting machine, solar dryer and detail research going on in CAZRI. Success stories in this village is equipment for garden tools were excellent and orchard ladder were helpful for the farmer.

In Khaltsi village, The horticulture department discussed the subsidized scheme related to drip irrigation, vermicomposting, power tiller, Tabular greenhouse, SDP plan (Nursery), Polythene and Sapling. Whereas Animal Husbandry Department discussed detailed information related to Council Unit & SDP unit of Cow Dairy Unit and KCC Scheme. Also Silage, Feed, SDP dairy unit with 50% subsidies, Yak kid (Yak herder), Horse (75%)Subsidies. Artificial Insemination under NAIP programme to aware farmer they can get of sex sorted insemination with best breed. They also get demonstration on low tunnel technology, mulching and drip irrigation. Good agriculture and Natural farming. From CAZRI institute they get information related to Seabuck thorne harvesting machine, solar dryer and detail research going on in CAZRI. Success stories in this village is equipment for garden tools were excellent and orchard ladder were helpful for the farmer.

In Tia Village A series of informative interactions began between our experts and the farmers. First, our team gave a brief introduction to VKSA, highlighting its aims and objectives. Subsequently, representatives from various departments shared valuable information about different government schemes and subsidies available to farmers. Our experts also introduced new technologies and scientific management practices aimed at increasing agricultural productivity. They encouraged farmers to share their challenges, which led to discussions on several pressing issues: 1. Codling Moth Infestation in Apple Orchards 2. Challenges in Seabuckthorn Harvesting 3. Substandard Quality of Polythene Provided for Composting Units by the Department 4. Distribution of Apple and Cherry Saplings Today, the respective department distributed 75 apple and 25 cherry saplings. However, this quantity was insufficient for the 230+ households in the village, leading to inequitable access. Success Stories of Tia Village, Ladakh 1. Cultivation of Cherry Plum and Pear Tia village has successfully introduced the cultivation of cherry plum and pear, thereby diversifying its fruit production. 2. Watermelon Cultivation Using Mulching Despite Ladakh's cold desert climate, Tia village has achieved successful watermelon cultivation through the use of mulching techniques. 3. Introduction of Exotic Vegetables The village has expanded its agricultural portfolio by cultivating exotic vegetables such as capsicum, broccoli, and lettuce under mulch.

Lastly in Temisgam village, Subsequently, representatives from various departments shared valuable information about different government schemes and subsidies available to farmers. Our experts also introduced new technologies and scientific management practices aimed at increasing agricultural productivity. success story temisgang : Mulching with exotic vegetable capsicum, brinjal, watermelon, cucumber ,cheery, peach, plum scope in temisgang. At last farmer also suggested that instead of vermicompost distribution they prefer changthang manure on subsidy. they also requested for sprayer machine for whole village, and aslo discussed the issue of pest infestation in apple.

Feed Back Farmer

- wareness regarding government scheme. Sucess stories Garden tools and ladder were excellent. Demostration on low tunnel technology. Good agriculture practices.
- Farmers engaged actively in discussions on canopy management, pruning techniques, and low tunnel farming, expressing a strong interest in adopting
- Farmers engaged actively in discussions on canopy management, pruning techniques, and low tunnel farming, expressing a strong interest in adopting
- awareness regarding government scheme. Sucess stories Garden tools and ladder were excellent. Demostration on low tunnel technology. Good agriculture practices.
- Experts gave onspot solution to the issues related to the agriculture, farming and livestock production. Its was an very fruitful
- Overall the campaign was very helpful and informative. farmers were very satisfied with the solution given by our experts.
